

SOMETIMES DIET AND EXERCISE CAN ONLY GET YOU SO FAR. IT MAY BE A STUBBORN METABOLISM, OR PERHAPS HEREDITARY FACTORS HAVE PREVIOUSLY PREVENTED YOU FROM HAVING THE BODY YOU ALWAYS DREAMED OF.

NOW THERE'S A WAY TO TARGET THOSE AREAS ON YOUR BODY YOU WOULD LIKE TO IMPROVE- WITHOUT LIPOSUCTION OR OTHER EXPENSIVE, INVASIVE SURGICAL PROCEDURES. IT'S A NEW BODY SHAPING TREATMENT CALLED **ACCENT YOUR BODY** FROM ALMA LASERS.

YOUR DOCTOR OFFERS **ACCENT YOUR BODY** AND HAS PROVIDED THIS BROCHURE FOR YOU TO ANSWER SOME OF THE COMMON QUESTIONS AND LET YOU KNOW WHAT MIGHT BE POSSIBLE.

Talk with Your Doctor about Accent Your Body

Ask your doctor if the Accent is right for your body reshaping needs, and then schedule an appointment to discuss the areas on your body you would like to target.

Go online to learn more and imagine what your before and after photos might look like, at **AccentYourBody.com**.

Alma Lasers Patient Education Series

Skin Tightening & Body Reshaping

Accent your body

Accent your Body™, provides controlled heat therapy to fight wrinkles and reshape any bulges or sagging skin on your body.

The treatment process is entirely comfortable, quick and virtually pain free. You will go through a series of office visits to see the full benefits.

Since it's not surgery – there are no incisions, stitches or even anaesthesia needed – there's no recovery time required. You can go straight back to work or home, with no one the wiser.

Tighter, firmer, more youthful skin.

Accent helps treat any problem areas you might have by tightening and firming any loose, wrinkled or dimpled skin *anywhere* on the body. The treatment is frequently used to treat thin delicate skin that develops on the face and neck. It can also tone up your arms, flatten your tummy and slim your hips and thighs.

Many patients also seek treatment for post surgical or postnatal abdomen, thighs or buttocks. Accent has proven safe and effective for those areas too.

Virtually Pain free

Most people find accent very comfortable. While pain tolerance is subjective, many patients often describe the sensation as a “warm massage”.

Targeted Heat Therapy

Accent uses cutting-edge medical technology, called radio frequency. It uses radio frequency energy to heat the dermis, our skin's inner layer. This targeted energy helps reorganize the cellular environment and stimulates your cells to release toxins, drain retained fluids and produce new collagen.

There is increased blood circulation and connective tissue shrinkage from the heat therapy. Both of these actions will improve your skin's colour and texture – which gives you that toned firm look. Treatment time depends on the size of the area to be treated.

Before

After

The Accent Difference: Visible Results

Accent provides visible results, because it is the only treatment of its kind to use a “dual layer” approach. This means it treats tissue at two different depths through both Unipolar and Bipolar radio frequencies. You will feel your skin grow thicker, tighter and smoother because of the dual layer targeting.

Over time and with follow-up procedures, your skin will tighten even more as new collagen develops. You may notice a slight redness, which should disappear in less than 24 hours. Generally four to eight treatments at two week intervals will be required, however, patients often see results right away.

Safe and comfortable

Accent is completely safe, cleared by the FDA, and has been used to improve the lives of thousands of patients worldwide, safely and successfully. The risk of significant side effects is extremely low.
